Keywords: interethnic communication, ethno-cultural component, personal support, competences.

PHYSICAL CULTURE AND SPORTS

I. Yu. Gorskaya, I. V. Averyanov

Investigation of long-term dynamics of psychomotor performance significant for the accuracy of technical actions of football players

The article presents the theoretical and analytical aspects of the study of psychomotor performance, important for the manifestation of precision technical actions of football players in view of long-term phase of athletic training. The publication is based on submissions received

during the years of research aimed at developing criteria for assessing the accuracy of various parameters in football. The study provided new information about the features of accuracy metrics players of different levels of skill, which can be used in the practice.

Keywords: psychomotor ability, accuracy parameters of technical actions, stages of athletic training, football players of different skill levels, accuracy target, stabilography.

E. S. Borisenkova, O. P. Kerer, A. Ya. Nayn

Credit-modular technologies of training as means of improvement of quality of training of graduates of university of physical culture

Materials of the analysis of questionnaire of students on use of credit-modular technologies of training as means of improvement of quality of training of university graduates are presented in the article. The methods of the organization of skilled work on adaptation of system of the credit-modular training, allowing to make active independent study of students with use of labile sources of information is given. Results of approbation of the developed educational and methodical complex allowing on new to organize educational cognitive activity of trainees on the basis of credit-modular technologies of training are shown.

Keywords: credit-modular technologies, training, means, improvement of quality of training, university graduates, physical culture.

V. V. Kozin, S. A. Kugaevskiy, A. V. Zykov

Methodology situational approach in technical and tactical training athletes playing sports

There is determined that the use of situational approach allows to implement the principle of typing situations and activities athletes playing sports. This approach reveals the essence of motor activity involves activity on the choice of methods and means of technical and tactical training to the identified variables specific game situations. Implementation of the situational approach allows us to consider the technical and tactical actions systematically through causality, which is important for the analysis and planning process, technical and tactical training athletes playing sports.

Keywords: situation, technique, tactics, activities, variability.

T. I. Krylova

Morphofunctional characteristics of the highly skilled sportsmen specializing in short-track

The article considers the morphological, somatic diagnostical and functional indices of the status of the body of highly skilled sportsmen specializing in short track. The obtained data can serve as guidelines for the initial and subsequent stages of selection in group sessions short track.

Keywords: indicators physique, functional performance of the cardiorespiratory system, highly qualified sportsmen, short-track.

A. A. Gorskiy, A. G. Karpeev

Ratio means a different orientation in the method of improving coordination abilities of cyclists BMX-race 10–11 years

The article presents the methodological and theoretical aspects of the selection of exercises aimed at developing different types of coordination abilities in young cyclists BMX-race. The publication is based on submissions received in research to identify the most significant types of coordination abilities for success in BMX-race. The study provided new information about the features of pedagogical approaches to the formation and development of coordination abilities cycling BMX-race, which can be used in the practice of coaches at the initial stage of training in this rapidly developing in Russian sport.

Keywords: Coordination abilities, cyclists BMX-race, orientation ability, kinesthetic ability, the ability to maintain balance, the general and special funds.

Yu. V. Demchenko, Yu. V. Yatsin, V. A. Salnikov

Communication of motive manifestations individually psychological features at boxers of 12–13 years, at a stage of initial preparation

In the work communication of physical development, difficult and coordinate actions, with individual and psychological features of boxers at a stage of initial preparation are considered. It is revealed that the level of physical development in teenagers of 12-13 years doesn't influence productivity in difficult and coordinate actions. Distinctions to a bowl of all are connected with typological features of manifestation of properties of nervous system.

Keywords: physical development, properties of nervous system, difficult and coordinate actions, memory, attention.

M. A. Korneva, A. S. Makhov, O. N. Stepanova
The main periods of formation and development Russian press in Russia

The article analyzes the main milestones of the formation and development of Russian press in Russia. The authors note that significant impetus to the development of the Russian regime was the inclusion in the program of competitions of persons with disabilities. The result of the work is to identify the main periods of formation and development of Russian press in Russia.

Keywords: Russian press, the periods of formation and development and persons with disabilities.

M. L. Listkova
The justification of content of stand alone classes for physical culture to students of Pedagogical University

On the basis of the studies it is identified one of the reasons for the decline in physical fitness because of the plan of University schedule. Here is demonstrated the justification of content of stand alone classes for a physical culture to students of Pedagogical University, allows to strengthen a health, to improve the level of physical preparedness, taking to the account educational and professionals features.

Keywords: alone classes for a physical culture, students pedagogical university, health, physical fitness.

T. I. Epp, G. N. Pshenichnikova
Technique of perfection consistency group motor actions qualified athletes in cheerleading

The technique of improving the consistency of motor actions in team competitive cheerleading compositions and the results of its application is considered.

Keywords: cheerleading, team, musical and rhythmic preparation, coordination preparation.

TEACHING METHODOLOGY

V. A. Arzhanov, A. I. Odinets, V. V. Pshenichnikova
The experience of the laboratory work on special subjects

The work discusses options for labs using simulation software elements of digital technology and digital signal processing components such as internal encoding system of digital television standard DVB-T, randomized data, discrete cosine transform coding of Reed-Solomon.

Keywords: modeling software, digital TV, radio, and education.

E. V. Tsoupikova
Teaching to reconstruct text presupposition and speech situation as the ways to identify information verity

The author describes the methodology for teaching to reconstruct text presupposition in order to identify the verity of perceived information. The article deals with presupposition types and ways to identify them from viewpoint of logic. It also proposes synthetic and analytical operations to reconstruct presupposition of various types. Reflective listening methods allow to apply preposition reconstruction operations in hands-on teaching process.

Keywords: presupposition, text reflective listening, communication.

N. D. Shatova

Interiorization of reflective activity of students in the learning process of solving logical problems: psychological-pedagogical aspect

The article suggests a method of training the students of 5 - 6th grades, solving logical problems. The author proved that the successful process of training students to solving logical problems will contribute to the organization of teacher training process, aimed at the internalization of reflective activity of students.

Keywords: interiorization, reflexive action, logical tasks.

L. Yu. Zolotova, L. M. Lomiashvili, A. N. Zolotov
Experience in interactive teaching methods application as a part of third generation of GEF at Department of Therapeutic Dentistry of OSMA

Only numerous manipulations' repetitions with their gradual complication can be real opportunity for the formation of competences. In this regard the attempt is carried out in order to analyze a multistage way of transfer the stomatology-therapist professionalism to the students in the conditions of their interaction using pedagogical technologies bases such as «master class», «a clinic method». Strategically final important step is the formation

of professional skills is practice where the situation and available knowledge synthesis' are analyzed by a doctor.

Keywords: pedagogic technology, master class, a clinic method, practice, professional competence.

A. V. Mordyk, O. G. Ivanova
Using case-study method in teaching of phthysiology in medical school

There are analyzed the results of student learning using case-method in the subject phthysiology. The analysis shows that the groups which use the case- method, students had significantly higher rates (18,8 %) of learning outcomes and demonstrate great interest in studying the subject and creativity in performing tasks.

Keywords: case-method, results of student learning, phthysiology, medical school.

A. V. Nelidova, E. N. Kotenko
Organization of independent extracurricular professional work during studying the discipline «Propaedeutics of internal medicine» (on the grounds of specialisation «Therapeutic concern»)

This article is concerned on one of the variants of independent extracurricular work organization of the third course Therapeutic faculty students during studying Propaedeutics of internal medicine. The authors bring the example of the workbook for independent preparation of students for classes and the introduction results of the mentioned technology used for training future Health service employees.

Keywords: independent extracurricular work of student, workbook, professional training.

CULTUROLOGY. HISTORY OF ART

L. G. Medvedev
Composition in sociocultural space of art education

This article discusses the opportunity of composition during preparation of the artist. There is analyzed the content of the composite construction. It settles the problem of development of composite sequential art in the whole system of art education.

Keywords: composition, creative work, plan, harmony, integrity images.

N. P. Golovacheva
On formation of holistic perception in drawing

In the article the problem of formation of professional drawing students' artistic disciplines by developing holistic perception. It is based on studies and sketches and brief drawing by special educational settings.

Keywords: perception, integrity, drawing skills, outline.

A. N. Gumenyuk, P. A. Balyuta
The architectural monuments of Tyukalinsk town in late XIX – early XX centuries. The catalogue

The paper presents the brief scientific catalogue of the architectural monuments of Tyukalinsk town of Omsk region classified under the rubric of functional appurtenant, where every monument has description containing information about it and its stylistic characteristic adopted on the basis of collected and analyzed material.

Keywords: architectural monuments, catalogue, eclecticism, brick construction style.

E. S. Lykova
Textbooks on art in the system of children aesthetic education

The article describes scientific review of art textbooks. The article reviews art textbooks in accordance to federal educational government standard of second generation. The article examines the concept of art education, which are in the basis level of modern textbooks for the second level education.

Keywords: art textbooks, art educational concepts.

O. V. Pavlovskiy, A. A. Pavlovskaya
Criteria for evaluation of special skills of artistic metal craft

This article discusses criteria for evaluating specific skills of artistic metal craft. With the help of the skills you can evaluate the level of not only specific skills and creative and pedagogical aspect of this process also.

Keywords: skills, criteria, design, integrity.

E. V. Skripnikova

Observation as the basis of the fine art in the system of professional education

The article provides a detailed analysis of such person's skill as an observation from philosophical, psychological and pedagogical point of view. It highlights the importance of this ability for a fine art student.

Keywords: observation, observation, perception, imagination, painting, artistic thinking.

L. V. Chuyko

The varieties of design of upper panel of window-framing in the fretwork of Western-Siberia cities in the end of XIX – the beginning of XX centuries. On the question of classification

The article analyzes the design of upper panel of window-framings in the fretwork of West-Siberian cities in the end of XIX – the beginning of XX centuries. On the ground of visual materials the author defines different types of upper panel of window-framings, it's constructions, forms, and some features of decorative compositions.

Keywords: wooden architecture, upper dashboards, fretwork, ornament.

V. F. Eroshkin

Photographic in the context of contemporary visual culture

The relationship of concepts Photo – Photographic – Graphics, similarity and difference of its technological processes manifesting in special visual effects as well as their place in Contemporary Art and Design are examined in the given article.

Keywords: photographic, silk screening, serigraphy, graphic design.

N. A. Levdanskaya

Primorye art in the beginning of XXI century. The culture situation of "Polistilism"

The article contains the results of analysis of the processes which took place in the Primorye art in the beginning of XXI century: the change of

the old and establishing of new cultural institutions, the situation of "Polistilism", the extension of art projects with Asia-Pacific Region's countries is concidered.

Keywords: Primorye art in the XXI century, "Polistilism", cultural institutions, art projects.

A. N. Gumenyuk

S. S. Volkov trading house. On the problem of attribution of cultural heritage of Omsk Lyubinskiy prospect

The article analyzes the building located at the intersection of Lyubinskiy prospect and Gasfortovskaya street; the stylistic features are marked. The recognizable creative traits of an architect E. I. Ezet are concretized and the special monument attribution is offered.

Keywords: eclectic, architectural monument, attribution

ART DESIGN. ADVERTISEMENT

E. V. Bobrova

The formation of exhibition space as the important attribute of education of a designer

The problem of value and functions of exhibition space within educational process for a student designer is brought up in the article. In the article the review of the main exhibitions sites of Siberia and Omsk in particular is done. Besides, the necessary components of formation of exhibition space are considered in the article.

Keywords: the exhibition, the exposition, the art-design, exhibition space, exhibition capacity.

Уважаемые коллеги!

**Приглашаем вас 11–13 ноября 2014 г.
принять участие
в IX Международной научно-технической конференции
«Динамика систем, механизмов и машин»
Материалы конференции будут включены в РИНЦ
(Российский индекс научного цитирования)
и размещены на портале Научной электронной библиотеки (www.elibrary.ru)**

Научные направления конференции:

- Секция 1 Динамика машин и механизмов
- Секция 2 Динамика электротехнических комплексов и систем. Энергоэффективность, энергосбережение, энергоаудит
- Секция 3 Информатика динамических систем и измерительных процессов
- Секция 4 Приборостроение, информационно-измерительные процессы, технологии и системы
- Секция 5 Динамика тепловых и низкотемпературных процессов
- Секция 6 Динамика летательных аппаратов. Транспортные и космические системы
- Секция 7 Технология производства машин
- Секция 8 Материалы и технологии. Нанотехнологии и наноматериалы
- Секция 9 Математическое моделирование и исследование операций
- Секция 10 Физико-химические и экологические системы, механизмы и устройства
- Секция 11 Радиотехнические системы, устройства и СВЧ-технологии, информационно-телекоммуникационные системы и безопасность
- Секция 12 Техносферная безопасность
- Секция 13 Социальные системы: детерминация и взаимодействие
 - Подсекция Динамика социально-экономических систем. Экономика инноваций, кластерная политика
 - Подсекция Человек в современном коммуникативном пространстве
 - Подсекция Социальная работа как фактор устойчивого развития социальных систем
 - Подсекция Терминология как средство передачи информации. Динамика систем описания и преподавания иностранных языков. Научный перевод.
 - Подсекция Библиотека в системе информационного обеспечения образования и науки
- Секция 14 Системы вооружения и военной техники, информационные технологии в военном образовании
 - Подсекция Динамика систем вооружения и военной техники
 - Подсекция Динамика профессиональной подготовки военных специалистов
- Секция 15 Живые системы

Представление докладов

Желающие принять участие в работе конференции должны в срок **до 16 мая 2014 года** направить следующие материалы:

- заявку на участие в конференции (образец на pro.omgtu.ru);
- печатный и электронный варианты доклада, оформленные в соответствии с требованиями (образец на pro.omgtu.ru);
- экспертное заключение о возможности открытого опубликования;
- копию финансового документа об оплате оргвзноса.

Организационный взнос

Оргвзнос составляет 690 рублей (включая НДС).

При перечислении оргвзноса нужно указать следующие платежные реквизиты: ИНН 5502013556
УФК по Омской области (ОМГТУ, л/с 20526Х06430) КПП 550101001, ОКАТО 52401380000, ОКТМО 52701000;
р/с 40501810500002000483 в ГРКЦ ГУ Банка России по Омской области г. Омск, БИК 045209001,
ОКОНХ 92110, ОКПО 02068999 (в назначении платежа обязательно указать код — 0000000000000000130)
с пометкой «Оргвзнос за участие в конференции «Динамика» (указать Ф.И.О. участника)».
