SUMMARY

HISTORICAL SCIENCE

D. I. Chernyavskiy, A. V. Dvoynev

The establishment and development of the department «Production and Management» in Omsk Polytechnic Institute in 1989–1992: initiation of education system in the field of management in OmPI

Based on the analysis of the different sources it is concluded that there is a systematic approach in the development of management education in unstable political environment and the socio-economic environment.

Keywords: university degree, management, education in the field of management.

T. A. Belova

The system of government in Russia during the regency of Anne Leopoldovna

The article describes the main trends in the reform Anna Leopoldovna as regent for her son — Emperor Ivan VI Antonovich — in relation to the system of higher and the central government in Russia. The author noted the main feature of the regency of Anne Leopoldovna — petty, regulatory manner of decrees and orders, the cause of which was the lack of knowledge and experience in managing a large empire.

Keywords: state administration, the Cabinet of Ministers; collegium; regent; the Senate.

I. A. Silayeva

N. N. Ogloblin about the first Siberian libraries

Works of the prominent Russian historian and the archivist N. N. Ogloblin thanks to studying of an enormous document file of archive of the Siberian order by it give a broad idea, in particular, of many book meetings of the Tobolsk diocese in XVII – the first years of the XVIII centuries, including a condition of its book meetings.

The researcher considered questions of distribution of divine service literature in Siberia and the first history of library's appearance there, including at Old Believers.

Keywords: N. N. Ogloblin, Siberia, Tobolsk diocese, XVII century, library, split.

O. V. Chudakov

Municipal self-government and social and political processes in the period of liquidation of democratic government and establishment of Soviet power (October 1917-first half of 1918)

The article examines the interaction of old city government bodies with local councils during the establishment of the Soviet power (October 1917-first half of 1918).

Keywords: Organs of municipal self-government, first world war, Soviet of work deputies, social and political processes.

A. A. Kiselev

«Revolutionary daily» members of Socialist Revolutionary Party in the early XX century

The article is devoted to the «revolutionary daily» members of the Socialist Revolutionary Party in the early XX century. The basic features and elements of daily life on the example of dynamite workshops and preparatory stages of terrorist acts are given.

Keywords: «revolutionary daily», daily life, terrorism, the Socialist – Revolutionaries, the SRs

M. M. Stelmak

Perception of foreign military presence in Russia in the reflection anti-Bolshevik press (based on the category «Newspapers and allies» the newspaper «Siberian Herald»)

The article investigates the problem of the relationship white movement with foreign allies. On the basis of intervention materials, published in the official gazette Provisional Siberian Government «Siberian Herald» reconstructed attitude to the military presence of foreign forces in Russia.

Keywords: Russian Civil War, the White movement, the Entente, the press, international relations.

I. I. Krott

The elimination of private rural entrepreneurial farms in Western Siberia (October 1917–May 1918)

This paper is based on archival and published sources, deals with the socio-economic transformation carried out by Soviet land agencies in the Siberian village at the end of 1917 - the first half of 1918. The author showed the process of elimination of entrepreneurial farms located on private lands, analyzed the specificity of the relationship between the authorities, the peasantry and rural entrepreneurs and Siberian Cossacks in a revolutionary instability.

Keywords: Siberian village, Soviet agricultural policy, rural entrepreneurial farm, the privately owned land, the elimination of private ownership.

N. A. Bonyushko, A. A. Semchenko

Comparative analysis of models of quality systems used at Russian universities

This article presents the results of the analysis of models of quality systems used at Russian universities at present and discuss their advantages and disadvantages in the current economic conditions, among which the authors emphasize the model of the system of quality management corresponding to requirements of IS ISO 9001:2008 (GOST R ISO 9001-2011), the EFQM model, the Belgo-Dutch model and a number of others.

Keywords: model, system quality, universities, Russia, educational service.

L. N. Akhtulova, A. L. Akhtulov, A. V. Leonova, A. V. Ovsyannikov
Features of process of acceptance of administrative decisions of the organization

The given article is devoted to the analysis, estimation and offers on improvement of the process of development of administrative decisions in an organization.

Keywords: the analysis, an estimation, process, development, the administrative decision, delegation of powers, style of a management

A. L. Akhtulov, L. N. Akhtulova, V. A. Bulakhov, N. V. Bulakhova, Yu. V. Bulakhova

Development of automated control system by standards of the organization

In the article the system to automate processes of development and introduction of standards of a various level in the organization is considered.

Keywords: control system, standards of the organization, system of the documentation, a static and dynamic part, structurization of interests.

I. V. Kalnitskaya, A. N. Danilov

Management solutions for model of organization management

Availability of a huge number of scientific publications about management solutions does not degrade the relevance of their role models in organization management. The article presents the author's approach to the decisions in a model of organization management including content analysis of the main components of the theoretical aspects of decision-making.

Keywords: management decision, management, organization, classification of management solutions, decomposition of management solution.

S. S. Stauriskiy, E. S. Stauriskiy

The concept of development of regional labour market of Omsk area (part 2)

In the article the concept of development of a regional labour market of Omsk area is offered. Features of realization of strategy of the given concept are shown. Strategic directions of development of inter-regional and international activity of Omsk area are certain. Directions of functioning of activity of institutes of a regional labour market for increase of their efficiency are revealed.

Keywords: employment, a regional labour market, Omsk area, the concept of development of a regional labour market.

D. D. Tsyrenov, G. D. Biliktueva
Statistical assessment of cognitive asymmetry of the Siberian Federal District by human capital

In the article cognitive capacity of the Siberian Federal District is targeted with statistic methods. Asymmetry of regional development is identified. Quality of regional knowledge economy is estimated using econometric modeling.

Keywords: region's asymmetry, cognitive potential, econometric modeling, knowledge economy, human capital.

A. A. Zubakin, A. V. Karpunina
Socially responsible energy companies as object of fundraising

Energy companies are investigated in terms of fundraising, socio-economic characteristics in the sphere of corporate social responsibility of above companies are given in this article. Basing on analysis of theory of fundraising and on experience of social responsibility, authors give recommendations for raising funds from big companies.

Keywords: social responsibility, fundraising, energy companies.

N. A. Morozova
The modern tendencies at credit risk – management of small and medium enterprises

The modern credit risk is defined in the article. The factors of risks at small and medium enterprises are found out and systematized. Up-to-date architecture of the conception of credit risk – management at small and medium enterprises is proposed.

Keywords: banking and credit risks, small and medium enterprises, typology of factors of risks, credit risk – management.

PHILOSOPHICAL SCIENCE

B. A. Arkhipov
Marxism: re-learning

In the article the main criticisms of some of the modern researchers of social-philosophical theory of K. Marx. It concludes that the critics make mistakes because of raised by opponents of the classics of Marxism. Ignorance of dialectics was and remains the Achilles heel of thinkers claiming a significant adjustment to the social-philosophical theory of Marx and Engels. Focuses on the practical significance of actual knowledge of the main provisions of Marxist theory are given.

Keywords: society, Marxism, socio-economic formation, dialectics.

N. V. Fedorova
Development of deviation as philosophical and religious problem

In the article the philosophical and religious (bible) aspect of deviation of development is considered. Books the Old testament and the New testament are analyzed. The reasons and sense of diseases from the God's position of trade are allocated.

Keywords: illness, sin, punishment, derelict, ordeal, explanation.

P. A. Balyuta
The space of culture and the cultural space: determining, specificity and interaction

This paper discusses the definition and the specificity of concepts «the space of culture» and «the cultural space» as well as their interaction and mutual influence. It is considered a system «the culture – the space of culture – the cultural space». There is

given an overview of the features of the cultural space formation. It shows the difference between the space of culture and the cultural space, as well as their position relative to each other. This paper analyzes the culture as a phenomenon in its relation with the space of culture and the cultural space .

Keywords: the cultural space, the space of culture, culture, cultural fact.

P. A. Korshunov
Gnoseological foundations of Democritus philosophy: between concept and idea

The philosophy of Democritus has great impact on the development of European philosophical and natural-science studying. Nevertheless, antique understanding of the atom differs in essential features from the modern one. Democritus's atom is a solid which is available for view, while the atom is ideal formation. That duplicity explains skepticism of Democritus in knowledge.

Keywords: atom, truth, thinking, concept, idea, skepticism.

E. I. Pavlova
Culture as a self-developing area of sense

Dictionary definitions of culture are the levels of spiritual and material development of society at a certain historical period. In this article, the definition of culture is considered as a developing semiotic-semantic space. The culture is the foundation of uninterrupted spiritual development of the society.

Keywords: culture, time, stretch time, sense.

O. O. Solomin
Technological utopianism of mental simulation in areas of human communication space

There is studied a group of objections raised in the application of Alan Turing test as a means to determine whether the machine has consciousness. The analysis made by the counter suggestion finds means of reducing the mental to linguistic, since no definite answer to this question is the fate of Turing test remains uncertain and posed problem, which is food for the constant debates and discussions has been for half a century, still finding its supporters and opponents in unresolved disputes «Could machines think?»

Keywords: Turing test, artificial intelligence, social communication, Internet.

P. G. Makukhin
The image of science as having an open rationality in Russian cosmism knowledge as one of the causes of inconsistencies in the assessments of the scientific component of its legacy

The article attempts to identify the inherent Russian cosmism reasons reproducing in contemporary literature critical characteristics of its scientific component, a prerequisite for the occurrence of which was initially incorporated in the structure of the content of this flow in the form of a very important moment for its various types: parascience, extra science, deviant science etc. This fact can be considered as an example of a characteristic of Russian culture in general variant interaction with scientific knowledge and semi-scientific, extrascientific including metaphysical defined principle of an open rationality (suggesting that standards used cognitive activity – not the only possible), which appeared as a heuristic for the development of philosophy and science.

Keywords: Russian cosmism negative characteristics, types of rationality, semi-scientific knowledge, problem of classification.

A. A. Radugin, O. A. Radugina
Postsekulyarizm as ideological matrix postmodern society

The authors aim to explore the peculiarities of worldview matrix of postmodern society. The paper base the theory that the worldview matrix of postmodern society has a contradictory character and get a big influence of postmodern philosophy. Determined processes of resacralisation take place in the society. However these processes aren't indices of revival of religiousness. The religion doesn't get the status of main form of ideology but become the object of consumers' fashion and method of self-identification. The phenomenon of simulation is manifested in the religion on the concept and social-psychological levels. It means that in the society the religion functions in growing degree within in limits of law of simulation.

Keywords: postmodern, postsecularism, worldview matrix, religion, play, simulation.

A professor in conditions of high education system reforming

Keywords: professor, manager, reforming

PHILOLOGICAL SCIENCE

Yu. V. Zorina
Knowledge and terminology formation of public and occupational safety science

A periodization of knowledge and terminology development of public and occupational safety science, models of term formation are described, terminology of each stage is illustrated. Quantitative and qualitative changes in terminology are due to the development of the science as a special kind of human activity.

Keywords: term, terminology, public and occupational safety science.

Yu. N. Revina
The functioning of terms in automobile media discourse

In this article it is described the terminological lexis which makes two types of unequal lexical part: narrowly-specialized terms and terms of wide using. Automobile discourse gives the opportunity to observe the way terms function in reality, which is not always reflected in the dictionaries.

Keywords: automobile discourse, media discourse, terminology.

O. S. Rogaleva
The «TopGear»: typological, content and stylistic particular qualities

The article is devoted to the specific features of the magazine. «Top Gear» is one of the most widely-spread automobile edition in Russia. The work describes typological, content and stylistic special features of the «Top Gear».

Keywords: the automobile discourse, type of edition, specialized press, stylistic particular qualities.

M. A. Fedorova
Genre approach to academic literacy development

In modern situation of globalized education and teaching competitive specialist, the author suggests to use genre approach in developing academic literacy both in native and foreign languages. Pedagogical aspect of genre studies includes the ability to understand and analyze various scientific texts in a given field, as well as to create such texts.

Keywords: academic literacy, scientific discourse, speech genre, competence.

N. V. Gorokhova
The problem of determining the notions «term» and «word» in modern linguistics

The article describes basic characteristics of the notions «term» and «word» in modern linguistics. The analysis of the main oppositions to the theory of language, as word, archeterm, prototerm, quasiterm, professionalism is done. There are attempts to investigate the possibility of adopting nominations to the category of terms. Basic criteria of similarity and differences in special terminology and words hereto are given.

Keywords: term, word, archeterm, prototerm, quasiterm, professionalism.

A. V. Shunkov
The author's image in the messages of tsar Alexei Mikhailovich (1654–1667) (To the problem of considering the text poetics of the transitional period)

The epistolary genre is considered as one of the most revealing in the transition period in Russian literature for several reasons. The first is the genre nature of the message initially has a «transitional» character, being between the two spheres of Book Culture of Ancient Russia: fiction and clerical work. Due to objective circumstances interaction between literature and business writing in the XVII century took new forms. Literature and document interpenetrating and complementing each other opened up new horizons in the author's creation of the transitional period.

Keywords: Russian literature in transition period, epistolary genre, creation of Tsar Alexei Mikhailovich.

Yu. S. Danilina, E. A. Debriyan
Special aspects of translation of terms and lexical-terminological neologisms in scientific technical texts (on the material of English machine-building terminology)

The article studies translation problems of terms and lexical-terminological neologisms in scientific technical texts namely in English machine-building terminology. It indicates that the most widespread mistakes are bound with syntactic production manner of English scientific terms. Methods and ways of appropriate translation of such terms are given. Lexical-terminological neologisms and unreasonable calquing are presented in the paper.

Keywords: English machine-building terminology, lexical-terminological neologisms, calquing, syntactic production manner of English machine-building terms, highly specialized terms.

A. V. Ulanov
Regional features Russian military discourse of the XIX - beginning of XX century

The article considers the features of the Russian institutional military discourse of XIX - early XX century, which are divided into local and neutral (Universal), not related to all territorial fixed military language. The analysis of lexical composition of the military discourse in the regional aspect helps to reveal the specifics of development of special language on the periphery, to reveal its General and private features. The analysis is carried out with the involvement of a wide source studies themes material: archive of documents, printed sources of the capital and regional origin.

Keywords: military discourse, regionalization, local features, Universal features, discursive formula.

V. N. Popkov

Deficiencies in planning and implementation of experimental component in pedagogical research

The aim of the article is to provide guidance for young educational researchers and their scientific advisers. The article analyses the most typical deficiencies in planning and implementation of experiments in thesis work of PhD, Master's and Bachelor's students.

Keywords: pedagogical experiment, control, validity, deficiencies.

V. B. Antipin, E. N. Mironenko, A. A. Tereshchenko

Establishing strong interest of sports in students of universities

In the article questions of formation of the motivational sphere of student's youth to sports activities are considered. It is noted that the stage-by-stage solution of the problem of an individualization of educational and training process in higher educational institutions allows not only to increase resistance of interest to sports activities at students, but also helps them with a consequence to switch over to systematic occupations by physical culture.

Keywords: interest to physical culture and sport, sports activities, motivational sphere of students, individual approach.

N. A. Getman, A. A. Petrushevich

Organizational-pedagogical conditions of individualization of students training in higher school

The article is devoted to the analysis of organizational-pedagogical conditions of individualization of training of students in higher education. The analyses is done of peculiarities of educational activity at an university and challenges for the development of a diverse, multi-level and multi-vector preparation of the student, providing the individual the possibility of successful ADAP-adapt to the rapid and dramatic transformations of the society.

Keywords: education system, professional education organization, models of individualization.

T. V. Makarova, A. A. Koshelev, O. A. Kozyreva

The culture of independent work of a student: typology, the model of formation

The article discovers features of forming and development of self-dependent activities culture realized at secondary schools. Models and definitions of self-dependent activities culture facilitate understanding of a hermeneutics-phenomena's at pedagogical discipline-knowledge.

Keywords: culture of independent work, the model of formation, criteria culture of independent work, the student's portfolio

I. G. Shpakina

Setting pupils' personal safety competence in modern school

The article describes the way and results of the comparative pedagogical research of setting one of the most important personal competences in modern society. It means here the competence of personal safety in secondary school of two countries – Russia and Israel. The article suggests as well the criteria for assessment of that competence. The research has been made by means of parametrical approach.

Keywords: key competence, personal safety competence, pupils' psychological safety.

O. A. Prikhodko

Education of basical personal values in forming social and cultural region

This work describes modern approaches to formation of value and moral priorities, based on the principle of individual education in forming social and cultural region. Problems formulated are aimed at forming of a gifted person, who is able to do effective creative activity, at forming a person as a deserved regional representative. The issues of personal competence are stated in a modern society. And also it is defined the features of value-orientation activity of social and cultural institutions, which are experienced in application of a new organizational forms of cultural and educational activity of rising generation.

Keywords: education personal, sociocultural environment, personal competence, development giftedness, creative potential, integration educational and cultural sectors, supplemental education.

V. V. Cheshegorov

The subject-and-object positioning of university in the process of developing student understanding

The specification of subject potential of the student in the course of professional formation assumes correlation of dynamic lines of the personality and the cultural units which have found reflection in didactic artifacts, socially focused transformations.

Keywords: objectivization, personable, positional, socially-oriented transformation.

PHYSICAL CULTURE AND SPORT

I. Yu. Gorskaya, L. E. Medvedeva

Comparative analysis of selected indicators of coordination abilities of students of high schools in different cities

The article presents the results of study on the performance of motion readiness in students. The novelty of the research lies in the rationale and design criteria for evaluating various types of coordination abilities that are relevant to students from different areas of training. There is revealed the need to take into account regional, climatic and geographical and other features in the evaluation and development of coordination abilities of students.

Keywords: coordination abilities, the ability to orientation in space, reactive ability, kinesthetic ability, balance, standard evaluation criteria.

Zh. B. Safonova, I. N. Sheveleva, V. G. Kugaevskikh, I. V. Polozkova, G. A. Petrova

To the question of the distribution of students of special medical groups for physical training

The article presents the analysis of regulations and orders of state health and education of medical control and distribution of the students at the medical group for physical training. The basic forms of organization of physical education of students with a deviation in the health status of a special medical group are given.

Keywords: students, health, physical education, special medical group.

I. V. Averyanov, A. I. Kuznetsov

Psychomotor performance as criteria of game role footballers at the age of 13–14

The article presents the results of research of psychomotor performance, that important to increase the level of technical

readiness of players. Publication is based on materials, aimed on the development the criteria of control coordination preparedness, clarification and correction of game role. During a research obtained new information about particular accuracy metrics of players 13-14 years, features that can be used in the practice of football coaches, to improve the efficiency of the training process and competitive activities.

Keywords: football, psychomotor ability, accuracy parameters of technical actions, the specialize, target accuracy, stabilography.

L. A. Zelenin

Training of high class young oarmen in the context of training for large scale competitions

The article deals with the setting stage of canoe training as the most difficult and complex but obligatory for training of future sportsmen of the high international class who will present the country in very prestigious competitions. The elaborated system of balance formation and a complex of canoe simulators allowed the sportsmen in modeled environmental conditions (outdoors in winter) restricting inefficient trajectories of rowing motion actions and actively forming the rowing technique, conforming to water conditions.

Keywords: rowing and canoeing, setting training stage, simple canoeist position, complex canoeist position, «Balance training canoe simulator», snow sliding «Canoe simulator».

Yu. Yu. Krikukha, A. V. Mishchenko, I. A. Kuznetsova, L. G. Kharitonova

Structural components of body composition of Greco-Roman style wrestlers in conjunction with physical performance

The article presents the results of studies of the component body composition of the highly qualified Greco-Roman style wrestlers of two weight categories; there is determined the structure of the correlations between the component body composition, strength readiness strength abilities and level of physical performance of athletes in different zones of power.

Keywords: Greco-Roman wrestling, body composition, physical performance, high sport qualification, weight category.

O. V. Korableva, V. D. Panachev

Analytical approach to physical education in higher educational institution

In the given article the analysis of the changes to pedagogical technology and methods of the undertaking occupation on physical culture in university is done.
