SUMMARY

HUMANITARIAN SCIENCES

A. G. Dianov

Interaction of Siberian workers and peasant inspectorate, State bodies and social organizations of Siberia in the middle of 1920's

The article investigates the interaction of provincial offices of Workers 'and Peasants' Inspectorate with supreme organs of Party and State power of Siberian provinces, trade unions, government organizations and enterprises of the provincial centers between 1923 and 1925. The problem under review is the subject of a special study for the first time. The author analyzes some general features and characteristics of the relationship between control bodies, on the one side, and State organizations and trade unions, on the other side, on the base of Siberian and central archives.

Keywords: Siberia, work-and-peasant inspection, state organizations, professional unions.

V. A. Kutepov, K. A. Ankusheva

On the history of introduction of epaulettes and insignia in the army of Russia (1732–2014). Part 2 (1941–1956)

In the article the history of introduction of signs on distinction in Russian army is briefly reflected. The given obligatory accessories of the form of uniform of military men serve for definition of a military rank, an accessory to a kind or a sort of the armed forces, a separate part or division.

Keywords: signs on distinction of military men of army of Russia.

E. V. Melnikova

Problems of implementation of main directions of state policy of the Russian Federation in sphere of theatrical activity (the end of the 1990th – the beginning of the 2000th)

The theatre as the part of national culture of country is object of special attention from the state. Within regulation of theatrical activity the state is urged to create favorable conditions for functioning of theatrical collectives. Normative legal acts are documents in which conceptual fundamentals of policy of the state in the sphere of theatrical activity are stated. Therefore, research of the state acts reveals priority directions of policy of the state, and also correlates the declared purposes to their direct implementation, and further on this basis it becomes possible to reveal problems of realization of the state policy in the specified field of activity.

Keywords: theater, theatrical activity, state regulation of theatrical activity, federal legislation on theatrical activity.

M. I. Fedorova

Peasant resistance to the state reforms — experience of XX century

Active and passive forms of peasant resistance to the state agrarian reforms in the period of XX century are considered in this article. Active forms of resistance are considered as collective activities of the lowest section and groups of population, expressing their social- economic and political interests publicly: in village- community verdicts, revolts, performances, meetings. The analysis of the collective-farm Rules and its observance according to the records of common meetings of collective farmers and management board of collective- farms allowed authors to characterize different breaches of labour discipline and damage of collective farm property, consequences and the reasons of breaches. The breaches of labour discipline and the damage of collective farm property are considered as the form of passive resistance to the state agrarian reforms.

Keywords: village-community verdicts, revolts, meetings, collective-farms, records of meetings of management board of collective-farm and common meetings, labour discipline.

G. P. Volkhonskaya, A. G. Okuneva

Russian dance sport: history and development

Keywords: Russia, history, sport, ballroom dance.

E. O. Volokh

Interaction between the institutions of civil society and state: historical and political aspect

The problem of evaluating the content and direction of development of the civil society retains its relevance for various social sciences,

including history. The conceptually grounded definition of civil society has still lacked in historical science, despite the long history of the development of approaches to its interpretation. The civil society as a historical and political phenomenon is at the center of attention for modern Russian history, because on the one hand, it inherits the previous historical tradition, on the other hand, it actualizes the problem of the development of their own models of civil institutions.

Keywords: historical and political phenomenon, the civil society, the recent history of the state, the civil society organizations, the local government.

R. V. Guselnikov

Causes of increased social tensions in Western Siberia (1990–2000)

Keywords: composition, motive, plotline, structural-semantic organization, principle of uncertainty.

E. V. Demishkevich

Thematic groups of English Railway Terms

The article is devoted to the thematic groups of English Railway Terms. The analysis of research material lets us describe and emphasize thematic groups which are included into terminological field «Railway Transport». In terms of word's combination into thematic groups, we can see how the sphere of railway is formed.

Keywords: thematic groups, basic and attracted terms, semantic field, structural order, system terminology nature.

M. S. Shumaylova

Polysemy of German Internet Terms

Polysemy is characteristic feature of the Internet terminology in German language, terminology. It is in process of formation and development. It is considered as logical and reasonable phenomenon since it mirrors the dynamic of network technology development. Specific nature of semantic paradigmatics lies in extralinguistic dependence of polysemy of the Internet terms of German language.

Keywords: terminology, polysemy, Internet.

V. Yu. Zhuravleva

Special aspects of borrowed terms from English terminology of architectural design

The paper deals with the borrowings from English terminology of the architectural design. It points out three main groups of borrowings. It highlights the quantity of borrowed terms from the total number of terms. The borrowings are classified chronologically, on the exterior marks, on the character of borrowed material. It is spoken in detail about the terms borrowed from the French language. It is also noted about the functioning of two component terminological collocations, where a borrowed word is collocated with a native word. It is pointed out the assimilation of borrowings with the norms of the received language.

Keywords: terminology, borrowings, term, classification, word building.

L. M. Dmitrieva, P. A. Balyuta

The place of art design in contemporary cultural space

This paper discusses the problem of the interaction of art design and cultural space of nature, the cultural space of society, information iconic and intellectual space; it gives the main goals and objectives.

Keywords: design, cultural space, eco design, social design.

G. N. Sidorov, O. B. Shustova, D. G. Sidorova

Biosphere and noosphere approaches of scientific rationality

The article presents an epistemological analysis of biosphere and noosphere approach from the standpoint of scientific rationality. It is shown, that the doctrine of the biosphere is natural process in the framework of scientific theory postulated a whole galaxy of scientists and philosophers. The teaching of the noosphere — this is utopian theory does not fit the current reality and the immediate prospects of its development.

Keywords: biosphere, noosphere, systematic, scientific rationality.

S. A. Demchenkov, N. S. Parshanina

Flash mob as urban phenomenon: social-philosophical and communicative aspects

The article considers flash mob (through the example of one of its varieties, the so-called real flash mob) as a form of social communication that takes place in virtual domains of the network, and it is played out in real public urban space. This work demonstrates that flash mob provokes the situation of intentional non-destructive short duration failure in everyday social processes. The grammar of flash mob represents a parodic playing of the ritualized grammar of social relations, which serves to draw attention to their semantic emptiness and fill them with existential content.

Keywords: real flash mob, social communication, urbanism, urban space, mass communications.

L. I. Mosienko

Religious values in the context of depopulation

The article deals with the problem of depopulation, as one of the most urgent problems of modern Russia. The author criticizes expressed by some authors view that in order to overcome the demographic crisis, you need a revival of religious values. The author believes that many children of religious families are not directly related to religious faith.

Keywords: religion, Christianity, depopulation, values, parenting.

O. B. Shustova, G. N. Sidorov

Man as a system factor of scientific knowledge

The paper presents an analysis of epistemological concepts of man as a system-forming factor. Author analyzes the biosphere in which man is the creator of a second nature, which came into conflict with the first nature. Mainly a factor which is faith, which forms the head scientist integrated approach to the analysis of results of research, development and hypotheses formulation of laws and theories.

Keywords: human, system, conflict, creativity, faith, rationality.

N. V. Nikolina

Episteme in the theory of human knowledge

The article discusses the main features of the humanities, and the shape of the place revealed premise knowledge in the theory of human knowledge. The concept of «episteme» is treated in the philosophy of Michel Foucault. The author analyzes the problem of the definition of «episteme» in the theory of human knowledge.

Keywords: humanities, episteme, knowledge premised.

E. S. Valevich, A. N. Ilyin

The Internet advertising in consumer society

A consumer society can be called the society of advertising. It is in terms of consumerism maximum actualizes the impact of advertising in mental sphere of people. The article discusses the specifics of the functioning of advertising in the virtual space. The Internet is a new and very promising field amplification of advertising impact on the society. Keywords: creativity, creativity, cadet, military professional activities.

S. G. Chukhin
Essence, functions and contents of civic education

The article discusses approaches to defining the essence of concepts of «civic education» and «Russian citizenship identity». The article examines: strategic objective, tasks, functions, forms and means of organization, structure components, criteria for assessing the effectiveness of civic education.

Keywords: civic education, Russian civil identity, civic education functions, forms and means of civic education.

G. D. Gefan
Probability theory and mathematical statistics: historical and philosophical aspects in the teaching of disciplines

In this paper, within a brief outline of the development of probabilistic representations shows the interaction of the two approaches - deterministic and stochastic. The article is intended, first and foremost, for teachers of mathematical and natural sciences. There are formulated some features of content of the probability theory and mathematical statistics that need to be considered in the development of teaching methods.

Keywords: accident, probability, statistics, determinism, stochastic, methods of teaching.

G. I. Sechkin
Optimization as effective method in pedagogical technology of knowledge synthesis

Optimization is the necessary and final stage of transition from knowledge integration to its synthesis. Discrete mathematics is a theoretical base of optimization, methods of the optimization and scientists' works to optimize educational process at school and in university.

Keywords: pedagogical technology of the knowledge of synthesis, methods of optimization.

N. V. Petrova
Recommendations of composition the curriculum for lifelong development of ICT-competence of bachelors of Pedagogy of profile «foreign language and foreign language»

The article is devoted to the recommendations of composition of the curriculum of teaching bachelors of Pedagogy of the profile «foreign language and foreign language» for lifelong development of their ICT-competence. It is recommended the sequence of learning subjects according to the succession and sequence of development of cultural ICT-competencies to professional and special ICT-competencies.

Keywords: curriculum, ICT-competence, bachelors of Pedagogy of the profile «a foreign language and a foreign language».

Z. Zh. Rabilova, N. P. Golovacheva
Specificity of creative activity in the plein air painting

In the article on the basis of generalization of scenic experience of outstanding artists of plein air painting, as well as psychological research of the peculiarities of the creative process, there is identified the most appropriate methodological sequence in mastering the art of landscape painting.

Keywords: nature, creativity, activity, color, tone, painting.

G. D. Babushkin, R. E. Rybin, V. P. Bachin
Productivity of competitive activity of highly skilled swimmers and its key factors

The problem of productivity of competitive activity in sportsmen is important in sports psychology. Its solution uses the received results in practice. The purpose of the present research is to evaluate productivity of competitive activity of the swimmers of high qualification and to reveal the influence of the psychological factors. The carried out research reveals the influence of a number of the psychological factors on productivity of competitive activity of the swimmers.

Keywords: competitive activity, factors, influence, swimmers of high qualification.

O. N. Kudrya, E. V. Filimonova
Features of competitive activity of tennis players of 12–14 years old at game on courts with different type of covering

Indicators of competitive activity of tennis players of 12–14 years old at game on courts with different type of a covering during various periods of a year cycle are analysed. Decrease in technical and tactical

indicators of competitive activity at game on platforms with a soil covering is noted. The interrelation between special indicators of competitive activity and a level of development of high-speed and power qualities is revealed. Need of development of high-speed and power endurance is proved by preparation for the competitions which are taking place on courts with a soft covering.

Keywords: tennis players of 12–14 years old, competitive activity, courts with different type of coverings.

V. N. Smolentseva, E. K. Buday
Gender differences in needs' manifestation, motives behind playing football

The results of genders' difference studies in motives for playing football in different age groups are presented.

Keywords: football, gender, motives, needs.

T. V. Koltoshova
Correction of locomotors system disorders in terms of a kinesiological approach in physical training of students

The paper dwells on the possibility of the use of educational and applied kinesiology, as integral technology preventing locomotors system functional disorders and spine in particular.

Keywords: kinesiology, prevention, spine, physical training, students.

L. F. Kolokatova
Formation of professional scope within framework of information and educational medium of physical culture in institute of higher education

In the article is revealed the concept of realization of project on creation of the site, which makes it possible to organize the work of leader for guaranteeing of operational working, analysis and calculation of enormous information for purposes of the significant training of students for their future role in the society as competitors on the labor market with the need for the formulation of the results of formation in the language of competence approach.

Keywords: information technology, competence level of preparedness, information and educational medium, knowledge component of preparedness, site as collective organizer.

Yu. D. Yakubov
Cooperation federal, regional and international sport systems in the process of realization of athletic-sport politics

The purpose of this article is directed on search of the main problems of construction of mutual relations between federal, regional and international sports systems on questions of joint realization of sport policy. The author has studied tendencies and principles of interaction of sports systems of different levels at realization of actions of public sport policy. The corporate control system of the Russian sports is constructed in vertical order by traditions of the international federations of sports. The problem of distribution of authority of the international associations in the Russian space has only formal character as updating of separate statutory acts is necessary. Now the principle of interrelation between delegation of separate state powers and strengthening of the control over the federal authority is applied.

Keywords: sports; state; state regulation; state policy; the sports organizations; sports systems.

E. M. Batenko
Features of special physical training basketball of students

The paper is devoted to issues of improving physical fitness of students of special-basketball. Application designs pedagogical actions aimed at training promotes as special physical preparedness and improve the quality of technical and tactical skills of basketball operations.

Keywords: special physical training, students-basketball, technique, physical, technical-tactical readiness.

I. R. Gasimov
The significance of factors determining susceptibility of children of 6–7 years old for ice hockey

This article summarizes the results of the survey coaching staff of Russian regions participating in the Championship of Russia on ice hockey. It presents the findings of the coaches of the sports schools of the Russian regions about the factors that determine the susceptibility of children 6–7 years for hockey. On the basis of the study there is revealed the leading factors that determine the susceptibility of children of 6–7 years old for ice hockey in each region. The efficiency of the

training of hockey players in sports schools of Russia's regions by level of sportsmanship.

Keywords: survey of coaches, sports stage, the predisposition to hockey, junior hockey players.

A. N. Martynenko, V. N. Konovalov, A. S. Taratukhin
Learning algorithm of self-insurance for young hockey players

The article discusses the possibility of building self-insurance learning algorithm players. The results of the ranking coaches and players physical qualities that form the basis of effective implementation self-insurance methods young hockey players are presented. Also, the values of self-insurance techniques groups in training specific situations and competitive activity of young hockey players are defined. The concepts of self-insurance «clash with the board» and «fall on the side» are concretized. According to the authors, the proposed data will allow experts to form an idea of the content and sequence of coach actions during training receptions self-insurance, increase the young hockey players' efficiency, as well as reduce injuries.

Keywords: algorithm, self-insurance, ranking, physical qualities, techniques group, injuries.

A. L. Akhtulov, L. N. Akhtulova, A. V. Leonova, A. V. Ovsyannikov
Modeling of decision-making in resource management of organization

The article is devoted to the analysis and offers on modeling decision-making process on perfection of resource management of an organization.

Keywords: analysis, estimation, modeling of process, administrative decision, resources of organization.

A. E. Miller, M. B. Abaeva
Theoretical aspects of development of cluster relations

Prerequisites of development of cluster relations are revealed. The cluster theory of development by justification of key signs and economic elements of the cluster relations is added. Justification of economic essence of development of the cluster relations is given.

Keywords: cluster relations, cluster educations, factors, conditions, economic elements.

M. Yu. Makovetskiy
International transactions of capital under conditions of financial globalization

The article reveals the content of the phenomenon of financial globalization, providing extremely contradictory impact on the economic development of modern States. In the context of a sharp increase in cross-border transactions in the global financial market identifies the positive and negative sides of exports and imports of capital for the involved countries. According to the results of the analysis are formulated proposals on improvement of the Russian financial market in order to enhance its role in innovative development and investment the economy.

Keywords: international capital flows; capital exports; imports of capital; internationalization; globalization; financial market.

E. S. Staurskiy
The analysis of condition of unemployment on the labour market of Omsk region

The author carries out research of unemployment on the labour market of Omsk region. Calculation of necessary statistics which characterize a condition of unemployment on the labour market is made.

Keywords: unemployment, labour market, Lorentz's curve, Lorentz's factor, factor Gini.

E. S. Staurskiy, S. S. Staurskiy
Unemployment in the labour market of Omsk region

The authors do the analysis of unemployment condition in the labour market of Omsk region. The certain statistics which characterize the condition of unemployment in the labour market of Omsk region is calculated.

Keywords: unemployment, variational number, normal law, number of areas, factor of asymmetry Pearsona.

T. V. Chibikova
Concept, essence and structure of real estate market
